Committees and Sponsors ix

I. Charge transfer

Theoretical studies of charge transfer in molecular ion–metal surface collisions
N. Lorente, D. Teillet-Billy and J.-P. Gauyacq 1

Charge transfer and electron emission in ion–surface interactions
U. Thumm, J. Ducrée, P. Kürpick and U. Wille 11

Wave-packet propagation approach in the theory of charge transfer in projectile–metal surface interactions
A.K. Kazansky, A.G. Borisov and J.-P. Gauyacq 21

Charge exchange and excitation phenomena at insulator surfaces
H. Winter, C. Auth, T. Hecht and A. Mertens 32

Charge transfer dynamics of low energy oxygen ion beams scattered from Cu(0 0 1)
A.C. Lavery, C.E. Sosolik and B.H. Cooper 42

Effects of Cs-adsorption on the scattering of low energy hydrogen ions from HOPG
M.A. Gleeson and A.W. Kleyn 48

Resonant charge transfer process in ion–metal surface collisions: effect of the presence of vacancies on the surface
J.A.M.C. Silva, J. Wolfgang, A.G. Borisov, J.P. Gauyacq, P. Nordlander and D. Teillet-Billy 55

Theory of charge transfer on MgO(1 0 0) surfaces
S.A. Deutscher, A.G. Borisov and V. Sidis 61

Use of spin-labelling techniques to probe the dynamics of He^+ ion neutralization at clean metal surfaces
D.L. Bixler, J.C. Lancaster, F.J. Kontur, P. Nordlander, G.K. Walters and F.B. Dunning 68

Surface influences on resonant ionization during sputtering
A. Sindona and G. Falcone 75

Charge exchange of fast metastable He-atoms in front of an Al(1 1 1) surface
T. Hecht, R. Pfandzelter, H. Winter and A.G. Borisov 82

II. Energy loss

Charge state dependence of the energy loss of slow nitrogen ions reflected from an aluminum surface under grazing incidence
J.I. Juaristi, A. Arnau, P.M. Echenique, C. Auth and H. Winter 87

Grazing collision of keV protons on LiF correlation between energy loss and electron emission
J. Villette, J.P. Atanas, H. Khemliche, M. Barat, V. Morosov and P. Roncin 92

Theoretical study of electronic energy loss recently observed in impact collision ion scattering of a low energy Li^+ from a TaB_2(0 0 0 1) surface
M. Kato, R. Smith 98

0168-583X/99/$ – see front matter © 1999 Elsevier Science B.V. All rights reserved.

Energy loss of fast protons specularly reflected from metal surfaces
M.A. Cazalilla and J.I. Juaristi 104
Mechanisms for ion-induced plasmon excitation in metals
R.A. Baragiola, S.M. Ritzau, R.C. Monreal, C.A. Dukes and P. Riccardi 110

III. Sputtering and ion emission

Electrostatic charging effects in fast H^+ interactions with thin Ar films
D.E. Grosjean, R.A. Baragiola and W.L. Brown 116
Sputtering by excitonic and elastic processes from solid neon by He ion bombardment
R. Pedrys, B. Warczak, P. Leskiewicz, J. Schou and O. Ellegaard 121
Velocity distributions of the negatively charged monatomic secondary ions of copper, silver and gold
P.A.W. van der Heide 126
Positive to neutral ratio of Cu species ejected from the Si(1 1 1)–"5 × 5"–Cu surface measured by multi-photon resonance ionization spectroscopy
D. Ishikawa, R. Ishigami and K. Morita 132
Kinetic energy distribution of molecular fragments sputtered from poly(ethylene terephthalate) under indium ion bombardment: effects of the primary beam energy and angle
A. Delcorte, X. Vanden Eynde, P. Bertrand and D.F. Reich 138

IV. Clusters

Cluster–surface collisions by phase-space compressed guided-ion beam methods
K.J. Boyd, A. Łapicki, M. Aizawa and S.L. Anderson 144
Interaction of mass selected antimony clusters with HOPG
B. Kaiser, T.M. Bernhardt, B. Stegemann, J. Opitz and K. Rademann 155
Mg clusters on MgO surfaces: characterization by MIES and electronic structure ab initio calculations
L. Kantorovich, A. Shluger, J. Günster, J. Stultz, S. Krischok, D.W. Goodman, P. Stracke and V. Kempter 162
Macrocluster desorption effect caused by single MCI: charges of gold clusters (2–20 nm) desorbed due to electronic processes induced by fission fragment bombardment in nanodispersed gold targets
I. Baranov, S. Jarmiychuk, S. Kirillov, A. Novikov, V. Obnorskii, A. Pchelintsev, K. Wien and C. Reimann 167

V. Reactive scattering

Energetics, timescales, and chemistry of low energy molecular ion–organic surface collisions
L. Hanley, H. Lim, D.G. Schultz, S. Garbis, C. Yu, E.T. Ada and M.B.J. Wijesundara 174
Quantum-resolved electron stimulated interface reactions: D_2 formation from D_2O films
T.M. Orlando, G.A. Kimmel and W.C. Simpson 183
Efficient hydration of Cs^+ ions scattered from ice films
T.-H. Shin, S.-J. Han and H. Kang 191
Surface induced dissocation in slow collisions of H_2^+ and O_2^+: information from the ion impact electron spectra
S. Krischok, H. Müller and V. Kempter 198
Scattering of small molecules from a diamond surface
J. Scheer, K. Brüning, T. Fröhlich, P. Wurz and W. Heiland 208
Energy- and angle-dependent trends in the trapping probability of O^+ incident on Cu(0 0 1)
A.C. Lavery, C.E. Sosolik and B.H. Cooper 214
Kinetic energy dependence of $TiSi_2$ film growth from low energy Ti^+ ion beams
S.M. Lee, E.T. Ada, H. Lee, D. Marton and J.W. Rabalais 220
Shallow implantation of Ti^+ ions in sapphire [α-Al_2O_3(0 0 0 1)]
H. Lee, S.M. Lee, E.T. Ada, B. Kim, M. Weiss, S.S. Perry and J.W. Rabalais 226
Solid-state ozone synthesis by energetic ions
R.A. Baragiola, C.L. Atteberry, D.A. Bahr and M.M. Jakas 233

Theoretical and experimental study of the correlation between forward and backward electron emissions induced by H^0 or H^+ projectiles incident on carbon foils
O.F. Smidts, A. Dubus, Z. Vidović, A. Billebaud, M. Fallavier, R. Kirsch, J.-C. Poizat, J. Remillieux and M. Rösler 239
ESD of H^+ and D^+ by a two-electron process from hydrogen adlayers on Pt(1 1 1)
C. Bater, J.H. Campbell and J.H. Craig Jr 246
Atomic number dependence of the forward/backward kinetic electron emission induced by slow ions in carbon foils
J.I. Juaristi and M. Rösler 254

VI. Applications

Probing aqueous-organic interfaces with soft-landed ions
K. Wu, M.J. Iedema, A.A. Tsekouras and J.P. Cowin 259
Scattered ion yields from bimetallic crystal surfaces
E. Taglauer, A. Steltenpohl, R. Beikler and L. Houssiau 270
Scattering and recoiling imaging spectrometry (SARIS) study of chlorine chemisorption on Ni(1 1 0)
L. Houssiau and J.W. Rabalais 274
Self-organization of monolayer (Pb, Sn) adsorbates at Si(1 1 1) surface recoil-implanted by keV ion impact
D. Nakamura, J. Yuhara and K. Morita 279
Surface magnetism of ultrathin Cr, Mn, and Fe films on Fe(1 0 0) studied via electron capture spectroscopy
T. Igel, R. Pfandzelter and H. Winter 286
Submonolayer homoepitaxy on Fe(1 0 0) studied by grazing ion–surface scattering: experiments and computer simulations
R. Pfandzelter 291

VII. Multiply charged ions

Multicharged ion–surface measurements at ORNL MIRF using decelerated beams
F.W. Meyer and V.A. Morozov 297
Hollow atom dynamics on thin-film covered surfaces
C. Laulhé, R. Hoekstra, S. Hoekstra, H. Khemliche, R. Morgenstern, A. Närmann and T. Schlathölter . 304
Angular dependence of energy loss in scattering of slow highly charged Ar ions from a Au surface
R. Schuch, W. Huang, H. Lebius, Z. Pešić, N. Stolterfoht and G. Víkor 309
